Secure access shall be continuous during the Term. TRULEO shall host the Platform on AWS Gov Cloud infrastructure and the Platform shall be deemed to have been accepted by the Department thirty (30) days after the start of the Term unless before such date The Department has provided TRULEO written notice containing reasonable details of non-conformity.

## Appendix A – Problem and Solution

### Problem

Law enforcement agencies across the country are facing severe staffing shortages, which directly impact officer morale, retention, and crime clearance rates. Officers and detectives are stretched thin, overwhelmed by administrative tasks, and often lack immediate access to critical information — such as previous call history or known threats — before responding to calls. Without consistent feedback, recognition, and real-time data, both officer safety and community outcomes are at risk. To meet these growing demands, agencies need an AI-powered assistant to help reduce administrative burdens, and ensure officers have the information and support they need to perform effectively and safely.

### Evidence-based Solution

TRULEO is an AI-powered assistant designed to support officers and detectives by:

- a) Assisting in drafting report narratives and witness statements
- b) Answer questions about policies, laws, and prior incidents
- c) Deliver automated coaching and recognition from BWC videos
- d) Generate investigative case summaries and insights
- e) Conduct large-scale witness canvassing

TRULEO is the most ethical, unbiased, and evidence-based AI assistant available to law enforcement. It is proven to reduce administrative workload, enhance officer training, and improve retention. Independent academic research demonstrates that TRULEO contributes to better outcomes for both officers and the communities they serve.

Proudly developed in the United States, TRULEO uses transparent, open-source methodologies and is integrated into the FBI National Academy curriculum in Quantico, Virginia. By improving officer performance, wellness, and morale, TRULEO represents the future of AI in policing.

### Conflict-Free Government Purchasing

TRULEO does not manufacture or sell weapons because doing so would undermine the neutrality and integrity of its AI technology. It is critical to maintain a clear separation between AI providers and weapons manufacturers to preserve public trust, avoid ethical conflicts, and ensure that technology used to enhance officer performance and accountability remains free from profit-driven influence tied to the use of force.

### Why 100% Made in America Matters: TRULEO's Commitment to National Security

Artificial intelligence represents one of the most powerful tools ever developed. When deploying this technology to U.S. law enforcement agencies, it is essential to ensure it is built entirely in America. TRULEO's 100% Made-in-America policy reflects our unwavering commitment to safeguarding national security, supporting the American workforce, and keeping critical technologies under U.S. control. This approach provides peace of mind to the law enforcement agencies we serve and to the taxpayers who fund them.
