

Independent ALPR Audits

Every ALPR hit is a record **someone will eventually ask you to defend.**

TRULEO's AI agents independently verify every search is justified, every case is supported, and your logs match your records — so you can keep your ALPR program running, proof in hand.

Independent, Cross-Platform, RMS-Matched

Any ALPR Platform

Flock Safety, Vigilant / Motorola VehicleManager, Plate Ranger & others

Matched to Your RMS

Confirms cases cited in ALPR searches are real and open

How It Works

- 1 Standard user account created for TRULEO's AI audit agent in your existing ALPR front end — like adding any analyst.
- 2 No API access. No vendor involvement. Front end only.
- 3 TRULEO's AI agent activity is itself logged and audited — same standard we hold yours to.
- 4 Logs pulled on a recurring schedule and retained independently of the platform's own window.

What It Provides

Public Impact Report

- Built for the community, council, or press
- Searches run, cases supported, vehicles checked
- Case types supported, with anonymized examples
- Plain statement of responsible-use safeguards

Internal Compliance Audit

- Built-in anomaly detection: repeat searches per plate, hits spanning unrelated cases
- Fully customizable thresholds, tuned to your agency's policy
- Corrects miscategorized / misleading auto-checks
- Officer-level flags: concentration risk, placeholders, access gaps

Why Agencies Choose TRULEO

Defensible

Independent findings that hold up in front of council, press, or court

Vendor-Agnostic

One audit standard whether you run Flock, Vigilant, Plate Ranger, or all three

Always-On

Recurring audits and long-term retention— not a one-time snapshot

Sample Output

Illustrative excerpts, built from one agency's ALPR audit export.

Public Impact Report — community / council facing

Anytown PD - ALPR Internal Compliance Audit (Command Staff Only)

PROBLEM	WHAT WE FOUND	RISK
Case-number check counted the wrong rows	Auto-check flagged 71% missing; real investigative searches are 100% compliant	LOW
Anomaly: repeat vehicle across cases	One plate searched 9x in 7 days, tied to 2 unrelated cases (default rule — customizable)	REVIEW
Data retention shortened	10 years → 90 days this period	GOOD

Internal Compliance Audit — command staff / oversight only. Anomaly rules shown use TRULEO's default, industry-best-practice thresholds — every rule is fully customizable to your agency's policy.

Drill Deeper With TruAssist

- TruAssist — TRULEO's confidential, agency-only AI chatbot assistant
- Ask plain-language questions about any flagged item
- "Show me every search tied to this officer"
- "What changed in our retention policy this quarter"
- Answers grounded directly in your agency's own audit data
- Confidential to your agency — nothing shared with the vendor or public
- Every TruAssist query is itself part of the auditable record
