

Your Officers Are Already Using ChatGPT. **Every Prompt Is a Risk You Can't Audit.**

TRULEO is a closed-loop, CJIS-compliant Trusted Intelligence Platform connected to your agency's own records, so officers get cited answers from your policies, state statutes, RMS, CAD, BWC and jail calls, not the open internet, and agency data is never used to train an AI model.

| What happens when case data goes into a public Chatbot?

- ✗ CJIS violation, on your agency's audit
- ✗ A discoverable record you don't control
- ✗ Fluent answers, unverified facts
- ✗ Your cases become someone's training data

| Side by side

	CHATGPT (PUBLIC)	TRULEO
CJIS Security Policy v6.1	✗ Consumer tiers: no. Gov/Enterprise: agency must configure, contract and audit it	✓ CJIS v6.1 compliant, SOC 2 Type 2, AWS GovCloud, on day one
Who built it, where it runs	✗ General commercial infrastructure; no US-citizen staffing commitment	✓ Made in USA by US Citizens, US-only infrastructure
Trains on your data	✗ Consumer plans may, unless each user opts out	✓ Never. Case data is never used to train any model
Conversation retention	✗ Kept in account history until deleted; subject to legal holds	✓ Assistant chats saved for 12 hours, then automatically deleted
Where answers come from	✗ Open web and training data, often uncited	✓ Your agency's records, policies and statutes plus 140+ OSINT sources, each answer linked to its source
Access & audit	✗ Personal logins; shadow IT your command can't see	✓ SSO/MFA (SAML, Entra), role-based access, CJIS access-event logging

ANSWERS OFFICERS CAN VERIFY
AI assists. Source material controls. Officers decide.

Your Body Cam Didn't See What You Saw. TRULEO Starts With Your Account.

| The officer **remains the author**

Field Notes assists an officer in documenting the officer's own observations, recollection and investigative activity. It does not replace officer judgment, determine what occurred, or make probable-cause or legal conclusions.

| If information is missing, TRULEO asks. **It does not guess**

Designed to keep AI-generated text from becoming officer recollection: gaps become questions for the officer, not generated answers.

| How it Works

1. Talk it through ✓

The officer tells TRULEO what happened, in their own words, on mobile or laptop.

2. TRULEO flags what's missing ✓

Prompts identify information your agency's template requires, such as timeline, witnesses and elements. The officer supplies the facts.

3. Attach the evidence ✓

Photos, recordings and BWC clips are supporting evidence, never the author of the narrative.

4. Review, correct, adopt ✓

The officer reviews the full report, corrects it, and adopts it before it enters your review workflow.

| What Field Notes Will Not Do. ✗

Supply facts the officer didn't provide

Silently alter an officer's statements

Make probable-cause, legal or credibility determinations

Decide guilt or what occurred

Present a BWC transcript as the officer's recollection

Replace officer review or supervisor approval

YOUR WORDS. YOUR REPORT. YOUR TESTIMONY.
