

CONVERT BWC VIDEOS INTO AN ASSET

Positive reinforcement and training. Unbiased, objective 100% body camera analysis.
“Random” body camera reviews are full of supervisor bias and fail to surface anything valuable.

The image shows a transcript of a body camera recording with several key moments highlighted. A mouse cursor points to a 'Create Highlight Reel' button. To the right, a summary box lists: 'Community Gratitude Received ✓', 'De-escalation attempt 11', and 'Non-compliant person 21'. Below the transcript is a video player showing a scene with a red box around a person. A 'High composure awarded ★' badge is also present. At the bottom, a 'TRULEO' interface shows three video thumbnails: 'July Community Gratitude Reel', 'Community Gratitude', and 'Thank you to our officers!', with a 'Create Highlight Reel' button and mouse cursor below them.

HOW IT WORKS

Highlights

Highly professional calls are automatically surfaced to supervisors for recognition.

Pending Review

Sensitive events are never auto-classified by TRULEO's AI and instead surfaced for a human to make a decision.

Assigned Videos

Assign users videos for recognition, training, coaching, or when onboarding.

Achievements

See summarized data on highly professional behaviors within your squad or department.

Send Praise & Mark Proficiency

Supervisors can give virtual atta-boys and identify proficient moments with training value.

Saved Filters

Customize your review workflow to quickly surface events for recognition, training, and coaching.

Moments

Clip specific areas of videos to create department content highlighting professionalism, or training.
