

Your Best Informants Are **Already on the Phone.**

Truleo analyzes every inmate call and surfaces the conversations that matter to your cases, so detectives don't have to know which inmate, phone number, or call to search first.

5M+ Calls
Analyzed Every Month

70+ Languages,
Auto-Detected and Translated

10M+ Hours of Calls
Behind our Jargon Libraries

100% Of Calls
Analyzed, Not a Sample

Inmates talk. Almost no one is listening. They discuss prior crimes, coordinate new ones, and pressure witnesses on recorded, lawfully monitored lines. Your team can review only a fraction of those calls. The leads in the rest go unheard.

What TRULEO Finds For Your Case

Suspect & Associate Connections

Discover who inmates are communicating with and identify previously unknown associates.

New phone numbers

Numbers mentioned or called, identified and linked automatically.

Gang & criminal networks

Connections across inmates, associates, locations, vehicles, and organizations.

Case connections

Calls cross-referenced against your open investigations automatically.

Victim & witness contact

Attempts to intimidate, influence, or coordinate stories with victims and witnesses.

Drug & contraband networks

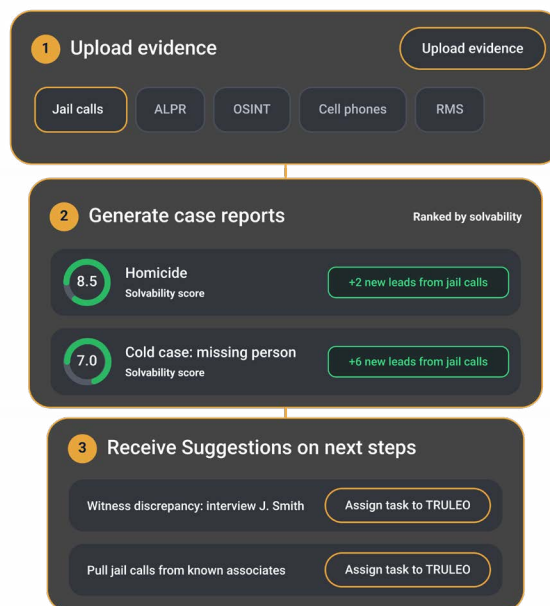

Inmates connected to suppliers, couriers, dealers, and outside coordinators.

Evidence of new crimes

Conversations about crimes being planned, committed, or concealed.

Coded language, decoded

Street slang, drug and firearm terms, and gang structure, tuned to your neighborhoods.

Ingest

Every call transcribed the moment it ends

Analyze

Threats, entities, and coded language flagged

Connect

Cross-referenced with open cases, RMS, and OSINT

Alert

Leads routed to the assigned investigator

One System, Two Missions

Safer Facilities. Stronger Cases.

Stop searching jail calls. Let the jail calls find your case.

Inside the Facility:

Every Call. Every Threat. No Blind Spots.

Suicide and self-harm risk flagged for command review

Planned assaults against correctional staff

Inmate-on-inmate threats, retaliation, and gang activity

Contraband coordination, including drone drops, vendor and food-service routing, and CashApp-style payments

Corrupt or compromised staff communications

PREA indicators surfaced for review

PIN sharing: voice ID flags inmates using another inmate's phone account

Use of Force and IA review templates built from the call record

Outside the Facility:

Every Call. Every Threat. No Blind Spots.

Leads on associates, phone numbers, and locations

Phone-number-to-inmate search: enter any number, see every inmate who called it

New evidence for open cases

New crimes committed from inside the facility

Added charges for contacting victims or witnesses

Solvability fusion: jail calls, OSINT, and RMS combined to rank the leads most likely to close

Know where the risk is before roll call.

01. Overnight Processing

Overnight processing. Every call from the previous day is analyzed against risk and investigative criteria.

02. Briefing Generated

Truleo compiles a command-ready intelligence briefing on overnight facility risks.

03. Command acts.

Leadership starts the day knowing exactly where to deploy attention.

★ For The Sheriff **FREE**

If your agency controls the facility, Truleo Jail Call Intelligence is provided at no cost: full call processing, threat detection, and daily command briefings.

For Surrounding Agencies **Paid Access**

Detectives at surrounding agencies gain investigative access to jail call intelligence tied to their cases on a paid subscription basis.

Put Your Digital Labor to Work.

Start a free 60-day trial or schedule a briefing for your command staff.
